Professional Summary

Computer Science undergraduate specializing in Data Analytics and Full-Stack Web Development. Experienced in turning raw datasets into actionable business insights using Power BI, SQL, and Python, and in building responsive web applications with the MERN stack. Seeking an entry-level Data Analyst or Software Developer role to apply analytical and technical skills to real business problems.

Technical Skills

- **Programming Languages:** Python, JavaScript, SQL, C++, HTML5, CSS3
- **Data Analytics:** Power BI, DAX, Power Query, Microsoft Excel, Data Cleaning, Data Modeling, Data Visualization, Exploratory Data Analysis (EDA)
- **Web Development:** React.js, Node.js, Express.js, REST APIs, Responsive Web Design
- **Databases:** MySQL
- **Tools & Platforms:** Git, GitHub, VS Code

Projects

Sales Performance Analysis Dashboard

Power BI

- Transformed raw, multi-table sales data into a clean model using Power Query, resolving duplicate and missing records.
- Authored 15+ DAX measures to track revenue, profit margin, order volume, and customer lifetime value.
- Added slicers and drill-through pages so stakeholders could filter results by region, product, and time period.
- Surfaced underperforming regions and product lines, informing recommendations for inventory and pricing adjustments.

Tools: Power BI, DAX, Power Query, Excel

Mobile Sales Analysis Dashboard

Power BI

- Consolidated transactional records from multiple sources into a single star-schema data model.
- Calculated growth-rate and market-share KPIs to compare device categories and price segments over time.
- Visualized month-over-month sales patterns to highlight seasonal demand shifts across mobile brands.

Tools: Power BI, DAX, Excel

Blinkit Sales Analysis Dashboard

Power BI

- Cleaned and standardized inconsistent product and outlet fields to ensure reliable reporting.
- Segmented customers by purchase frequency and basket size to identify high-value shopper groups.
- Compared outlet-level performance across store formats to flag locations needing operational attention.

Tools: Power BI, DAX, Power Query, Excel

Expense Tracker Web Application

Full-Stack

- Built a full-stack expense management app with JWT-based authentication and role-based access control.
- Implemented CRUD operations for income and expense entries backed by a MySQL database.
- Designed a responsive dashboard displaying spending trends by category and month using chart components.
- Connected the React frontend to a RESTful Express.js/Node.js API for real-time data updates.

Tech Stack: React.js, Node.js, Express.js, MySQL

Education

Bachelor of Technology (B.Tech), Computer Science & Engineering

2024 – 2028

JECRC University, Jaipur

Certifications

- Google Data Analytics Professional Certificate – Coursera
- Microsoft Power BI Data Analyst Professional Certificate – Coursera
- Meta Full-Stack Developer Professional Certificate – Coursera
- SQL (Basic) – HackerRank
- Python – GeeksforGeeks
- Deloitte Data Analytics Job Simulation – Forage

Achievements

- Completed 3 independent Power BI projects covering retail, mobile, and general sales domains using real-world datasets.
- Shipped a production-style full-stack web application from database design through deployment.
- Earned 6 professional certifications across data analytics and full-stack development in under 12 months.

Soft Skills

Problem Solving • Analytical Thinking • Communication • Team Collaboration • Adaptability
